Partnership Questions for upcoming Bank Prelims Exam

1) P, Q and R started a business by investing in the ratio of 5: 3: 7. After 4 months, P invested 20 % more than its initial investment and R withdraw three- seventh of its initial investment. Find the total profit at the end of the year, if the profit share of Q is Rs. 13383?

A.Rs. 51323

B.Rs. 45865

C.Rs. 60967

D.Rs. 57631

E.None of these

2) A and B started the business with the investment of Rs.6000 and Rs.8000 respectively. After x months, A added Rs.2000 and B added Rs.1000 with their initial investment. At the end of one year, total profit is Rs.4800 and A's profit share is Rs.2200. Find the value of x.

A.6

B.3

C.4

D.8

E.None of these

3) A, B and C started the business with the investment of Rs.2500, Rs.3000 and Rs.1800 respectively. After 6 months, B withdrew Rs.500 and after more 2 months, C invests Rs.500 to his initial investment. At the end of one year, the total profit is Rs.4330, then what is the profit share of B?

A.Rs.1650
B.Rs.1750
C.Rs.1870
D.Rs.1550
E.None of these

4) A received Rs.600 as a profit from the total profit of Rs.1250 which is A and B earned at the end of one year of the business. If A started the business with an initial investment of Rs.7200 and B joined with him after 2 months, then what is the investment of B?

A.Rs.9360
B.Rs.7820
C.Rs.8400
D.Rs.8260
E.Rs.9550

5) A, B and C started the business with the investment in the ratio of 4:7:9 and the investments period of A, B and C is 8 months, 9 months and 6 months respectively. If the total profit is Rs.7450, what is the profit share of C?

A.Rs.2300
B.Rs.2100
C.Rs.2400
D.Rs.2700
E.None of these

6) Sri and Ram entered into a partnership with an investment of Rs.5000 and Rs.4500 and they invested for 9 months and 15 months respectively. Sri receives 20% of the profit for being an active partner and the remaining profit is shared based on their profit ratio. Find the total profit received, if the profit obtained by Sri is Rs.3120.

A.Rs.4500
B.Rs.5200
C.Rs.6000
D.Rs.3800
E.None of these

7) P and Q entered into a business with an investment of Rs.2000 and Rs.3000. After certain months, R joined the business with an investment of Rs.4000 and at the end of one year, the total profit earned is Rs.4400 and the profit earned by P and Q together is Rs.3000. Find after how much month R entered into the business.

A.5 months
B.3 months
C.7 months
D.4 months
E.None of these

8) P and Q enter into partnership with an investment Rs.7500 and Rs.6000 respectively. After 6 months, P adds 20% of additional

investment and after 3 more months Q withdraws 2/6th of investment and R joins the business with Rs.9000. Find the total profit of P, Q and R together at the end of one year, if the average of the profit earned by Q and R is Rs.4650.

A.Rs.24000
B.Rs.19200
C.Rs.27000
D.Rs.35000
E.None of these

9) A, B and C started a business and the ratio of the investment of A and B is 3:2 and the investment of C is 5/3 of the investment of A. The investment period of A, B and C is 8 months, 12 months and 9 months respectively. At the end of the year, the profit share of C is Rs.2100, then find the total profit of the business?

A.Rs.6750
B.Rs.4340
C.Rs.7200
D.Rs.5780
E.None of these

10) Leela and Jaya entered into a business with an investment of certain amount. After 3 months, Leela withdraws 1/3rd of its investment and Jaya adds Rs.300. If at the end of one year, the total profit obtained is Rs.2100 and the profit share of Leela is Rs.600. Find the investment of Leela, if Jaya invested Rs.300 more than Leela.

A.Rs.900
B.Rs.1050
C.Rs.1200
D.Rs.600
E.None of these

Answers with explanation

1. Answer: C

The share of P, Q and R

= > [5*4 + 5*(120/100)*8]: [3*12]: [7*4 + 7*(4/7)*8]

= > 68: 36: 60

= > 17: 9: 15

The share of Q = Rs. 13383

9's = 13383

1's = 13383/9 = 1487

Total profit = 41's = Rs. 60967

2. Answer: C

Profit ratio=((6000 * x) + (8000 * (12 – x))):(8000 * x + (9000 * (12 – x))

=(96000 – 2000x):(108000 – 1000x)

(96000 – 2000x)/(204000 – 3000x)=2200/4800

11 *(204000 – 3000x) = 24* (96000 – 2000x)

2244000 – 33000x=2304000 – 48000x

60000=15000x
x=4

3. Answer: A

Profit ratio of A, B and C=2500 * 12:(3000 * 6 + 2500 * 6):(1800 * 8 + 2300 * 4)
=30000:33000:23600
=150:165:118
B's profit share=165/433 * 4330=1650

4. Answer: A

Total profit = 1250
Profit share of A = 600
Profit share of B = 1250 - 600 = 650
Profit ratio, A: B = 600: 650 = 12: 13
Investment of A = 7200
Let investment of B = a
Period of investment of A = 12 months
Period of investment of 8 = 12 - 2 = 10 months
Profit ratio, A: B = 7200 * 12: a * 10 = 8640: a
Then, 12:13 = 8640: a
a = Rs.9360

5. Answer: D

Profit ratio=4 * 8:7 * 9:9 * 6
=32:63:54
C's profit share=54/149 * 7450
=2700

6. Answer: C

Profit ratio of Sri and Ram = (5000 * 9):(4500 * 15) = 2:3
Let the total profit received be 100x
Profit received by Sri for being an active partner = 100x * 20/100 = 20x
Remaining profit = 100x – 20x = 80x
Total profit received by Sri = 20x + 80x * 2/5 = 52x
52x = 3120
x = 60
Total profit received = 100 * 60 = Rs.6000

7. Answer: A

Investment period of R = x
Profit ratio of P, Q and R = (2000 * 12) : (3000 * 12) : (4000 * x) = 6:9:x
(6 + 9)/x = 3000/(4400 - 3000)
15/x = 3000/1400
x = 7 months
R joined after 5 months

8. Answer: B

Profit ratio of P, Q and R = [(7500 * 6) + (7500 * 120/100 * 6)] : [(6000 * 9) + (6000 – 6000 * 2/6) * 3] : (9000 * 3)
= (7500 * 6) + (9000 * 6) : (6000 * 9) + (4000 * 3) : (9000 * 3)
= 99000: 66000: 27000
= 33: 22: 9

Total profit of Q and R = 22x + 9x = 31x
31x = 4650 * 2 = 9300
Total profit = 9300 * 64/31 = Rs.19200

9. Answer: B

The initial investment of A =3x
The initial investment of B = 2x
The initial investment of C = 3x * 5/3 = 5x
Ratio of the initial investment of A, B and C = 3x:2x:5x = 3:2:5
Ratio of the profit share of A, B and C= 3 * 8 : 2 * 12 : 5 * 9
= 8:8:15
The total profit of the business = 2100 * (8+8+15)/15 = 2100 * 31/100
= Rs.4340

10. Answer: D

Investment of Leela = Rs.x
Investment of Jaya = Rs.x + 300
(x * 3 + (x – x * 1/3) * 9)/((x + 300) * 3 + (x + 300 + 300) * 9) = 600/(2100 - 600)
(3x + 2x/3 * 9)/(3x + 900 + 9x + 5400) = 2/5
9x * 5 = (12x + 6300) * 2
45x – 24x = 12600
21x = 12600
x = Rs.600
